Appl. No. 09/487392

Amdt. dated June 10, 2003

Reply to Office Action of February 11, 2003

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1. (original): A method for fulfillment of institutional business card and

stationery product orders, said method comprising the steps of:

providing a requestor interface for entry of a distributed user's print order, said requestor

interface being adapted to enable the user to select a company tailored product according to a

predeterminable profile; and

processing the user's print order through a processor interface, said processor interface

being adapted to directly generate a pre-press product automatically incorporating said

predeterminable profile into said tailored product.

Claim 2. (original): The method as recited in claim 1, wherein said providing a requestor

interface step comprises the step of generating a prototypical product record.

Claim 3. (currently amended): The method as recited in claim 2, wherein said

prototypical product record comprises a template sufficient to completely define the typography

of a specific company tailored product.

Claim 4. (original): The method as recited in claim 3, wherein said template comprises

tracking, kerning and text adjustment information for said specific company tailored product.

Claim 5. (original): The method as recited in claim 4, wherein said template further

comprises graphics placement information for said specific company tailored product.

Claim 6. (original): The method as recited in claim 3, wherein said providing a requestor

interface step further comprises the step of developing a list of fields according to said

prototypical product record, each said field comprising an element of said company tailored

product's specification.

Claim 7. (original): The method as recited in claim 6, wherein said providing a requestor

interface step further comprises the steps of:

generating a plurality of prototypical product records; and

developing said list of fields according to said plurality of prototypical product records.

Claim 8. (original): The method as recited in claim 6, wherein said providing a requestor

interface step further comprises the step of defining a database management system, said

database management system being adapted to collect and store data according to said field list.

Claim 9. (original): The method as recited in claim 8, wherein said predeterminable

profile comprises at least some of said data collected according to said field list.

Claim 10. (original): The method as recited in claim 9, wherein said predeterminable

profile comprises user-indicative information.

7

Appl. No. 09/487392

Amdt. dated June 10, 2003

Reply to Office Action of February 11, 2003

Claim 11. (original): The method as recited in claim 10, wherein said predeterminable

profile further comprises company-indicative information.

Claim 12. (original): The method as recited in claim 8, wherein said predeterminable

profile further comprises company-indicative information.

as

Claim 13. (original): The method as recited in claim 12, wherein said user interface

comprises a server-side scripting environment.

Claim 14. (currently amended): The method as recited in claim 12, wherein said

processing step comprises the step of merging at least a portion of said data collected according

to said field list with said template of said prototypical product record to directly generate said

pre-press product.

Claim 15. (original): The method as recited in claim 12, wherein said processing step

comprises merging at least a portion of said data collected according to said field list with said

template of said prototypical product record to directly generate said pre-press product.

Claim 16. (original): The method as recited in claim 14, wherein said pre-press product

comprises a copier command set.

Claim 17. (original): The method as recited in claim 14, wherein said providing a requestor interface step further comprises the step of formulating a script, said script being adapted to automatically format said data collected according to said field list for merging said template of said prototypical product record.

Claim 18. (original): The method as recited in claim 17, wherein said processing step further comprises the step of formatting said portion of said data through said script prior to said merging with said template step.

Claim 19. (original): The method as recited in claim 17, wherein said script is further adapted to automatically import graphics data into said template of said prototypical product record according to the content of said data collected according to said field list.

Claim 20. (original): The method as recited in claim 19, wherein said processing step further comprises the step of importing graphics data into said template of said prototypical product record.
